

3D Arc

Why NOVO?

The most experienced team, In-House Research and Development, innovative technology, superb raw materials, we offer the best in every class:

Image Quality

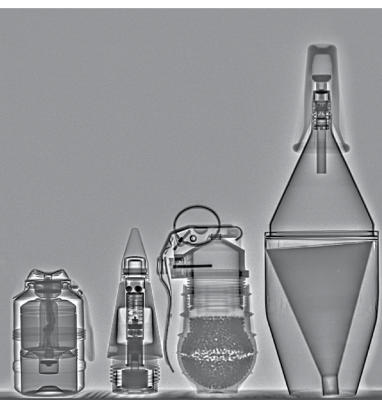

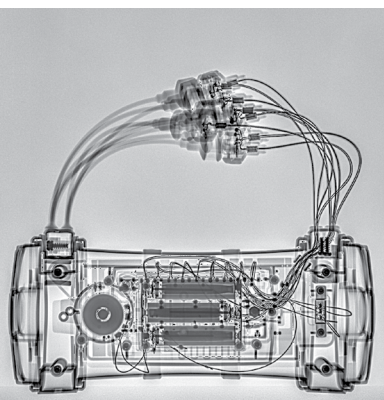

Reliability

Ease of Use

Professional Support

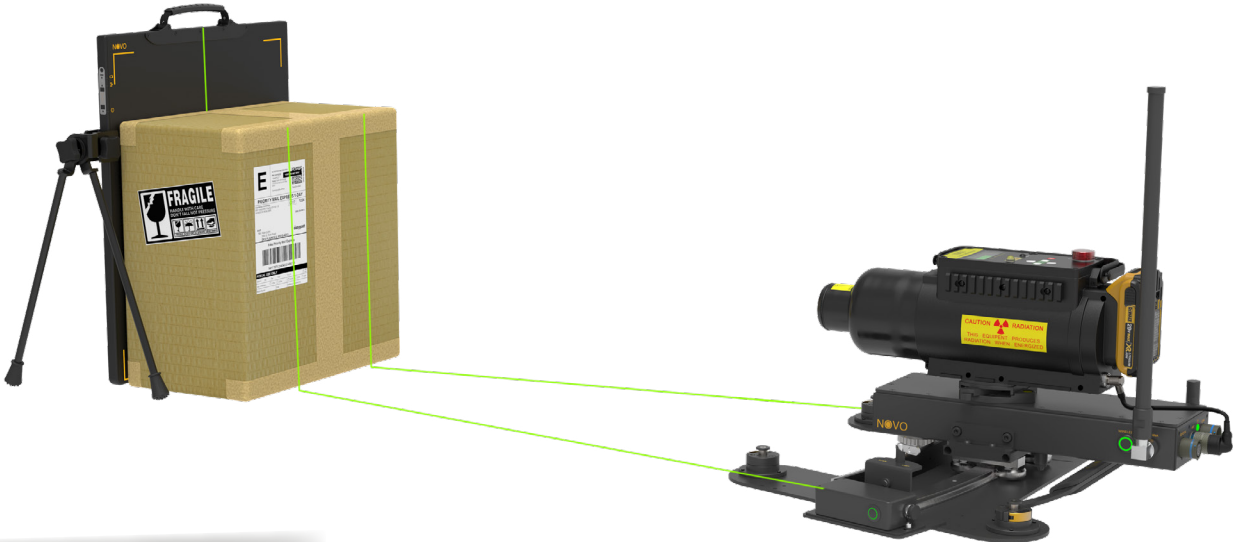

3D Arc

3D Measurement & Imaging

The 3D Arc provides precise location & exact measurements for IED disruption & manual entry. Extremely easy to use touch interface, provides accurate X, Y, Z measurements and 3D imaging in seconds.

Components

- Revolutionary 3D View Providing Fast Unprecedented Exact Location of all Internal Items
- Easy User Interface Provides X, Y, Z Extremely Accurate Measurements of 1-2mm in Seconds
- Automatic Process Providing Stereoscopic Imaging from Just the Second Image Taken
- Modular Tracks Allowing for Super Wide Inspection & Lightweight Compact Footprint for Transportation
- Automatic “Genie” Algorithm Pulls Out Minute Details on Even Just 1 Pulse Images
- Uses Standard Equipment and is Upgradable from Current System in the Market
- MIL Standard (MIL-DTL 38999) Connectors
- 5+ Hours Built-In Battery Operation
- Wired, Wireless & Hybrid Communication
- No Contact or Moving of the Object Inspected
- Super Easy Laser Assisted Placement Technology
- Unlimited Operation with AC
